

TDR-P

**Revolutionary USB Call Recorder
for personal use that everyone
has been waiting for!**

- ◆ Manual or automatic calls recording
- ◆ Advanced search with date/time/notes filters
- ◆ Possibility to create recordings archives on removable media
- ◆ Exporting feature for each single recording
- ◆ Possibility to send by e-mail any recorded call
- ◆ Password to protect the entire database or a single recording
- ◆ Warn tone or messages indicating recording in progress
- ◆ Records from telephone set or directly from analog line
- ◆ Built-in microphone for phonespeaker recordings
- ◆ Powered from an USB port
- ◆ Compression of audio files, in order to save HDD space
- ◆ No limit in recording space, HDD free-space related
- ◆ Online help

Thanks to TDR Personal, you will not longer have communication misunderstandings. TDR-P records automatically all incoming/outgoing calls or just those you wish to manually record.

The audio of the caller and of the called parties will be recorded into separate channels, for a better subsequently playback quality and intelligibility.

TDR-P must be connected to the telephone receiver of the telephone set in use, regardless of its type (analog, digital, VoIP). Alternatively, TDR-P can be directly connected to an analog telephone line or to a PBX extension.

TDR-P uses an USB port of the PC where the recording software will be installed.

The unit does not need a power supply as it's directly powered by the PC USB port.

A built-in microphone enables you to record loudspeaker calls, conference calls or simply to dictate quick voice notes.

Each single recording can be exported to any media or sent immediately as an e-mail attachment.

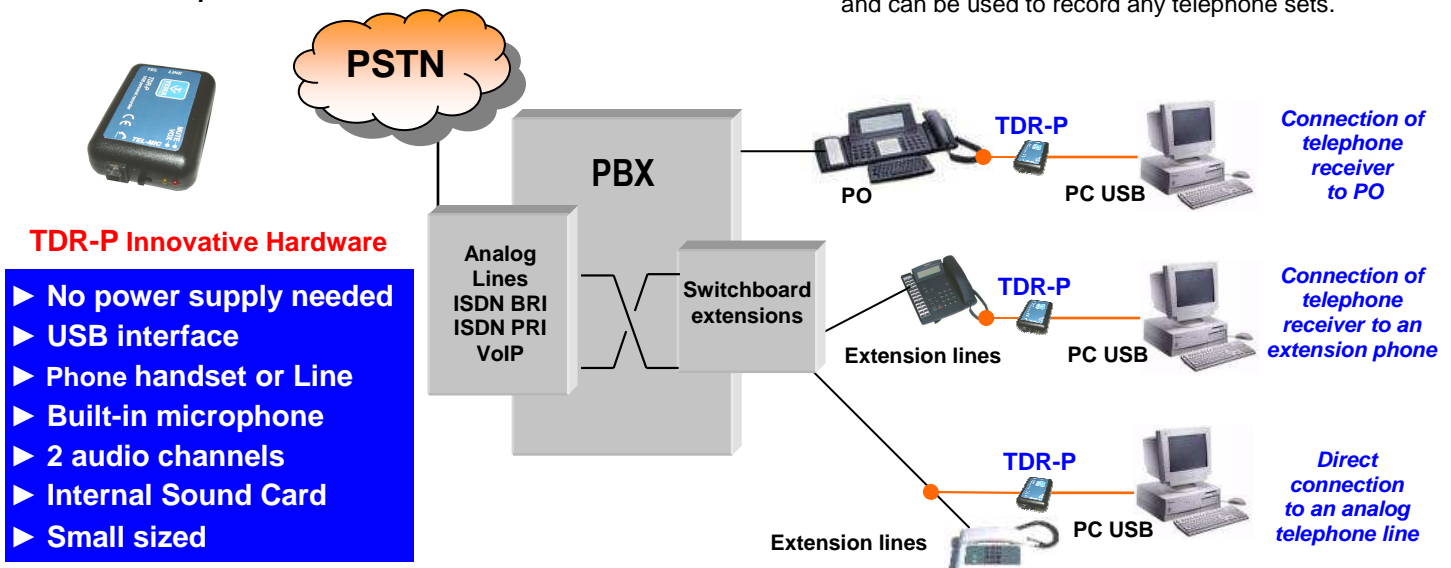

The recording software is easy to use and very powerful in his performances. The access to the recordings database is protected with a general password; moreover, each recording can be protected with a single password for subsequently playback.

For each recording, a related text field enables you to write useful comments in order to quickly identify the recording you are searching for, very useful for old or archived recordings.

TDR-P have the possibility to send a warn tone or a message to indicate to the users that the recording is in progress. In order to aid operators, up to 4 messages can be played by operator's command (i.e. Telemarketing, Companies welcome messages, etc.)

TDR-P can record in compressed or uncompressed mode. Compressed mode is lossless quality and permits HDD space saving.

The unit does not influence your telephone set at all and can be used to record any telephone sets.

TDR-P Innovative Hardware

- ▶ No power supply needed
- ▶ USB interface
- ▶ Phone handset or Line
- ▶ Built-in microphone
- ▶ 2 audio channels
- ▶ Internal Sound Card
- ▶ Small sized

Main features

- ◆ Automatic or manual activation of calls recording
- ◆ Separate audio channels for caller and called (stereo recording from phone handset)
- ◆ Possibility to insert a warn tone/message for recording in progress advice; up to 4 messages playing (i.e. for telemarketing services)
- ◆ High audio compression to save hard disk space, or uncompressed PCM mode recording for better quality recording
- ◆ Built-in microphone to record speakerphone calls, conference calls, or simply to record voice notes
- ◆ Possibility to record directly from most common telephone handset or directly from an analog line
- ◆ Possibility to write a text to any recording (comments, notes, etc)
- ◆ Advanced search filters by date / time / duration / text / notes etc
- ◆ Possibility to protect the entire database with a general password or single recording password
- ◆ Recordings conversion to standard audio file for exporting or e-mail forwarding option
- ◆ Possibility to archive all the recordings on various types of removable media (CDROM, DVD, Flash, USB drive, etc...)
- ◆ Possibility to delete previously archived recording buffers in order to save hard disk space
- ◆ Small sized unit
- ◆ VOX and MUTE LED indicators
- ◆ Internal jumpers settings in order to boost recordings signals coming from internal microphone or from telephone handset.
- ◆ Works with all phone sets, Analog, Digital, IP phones

Technical features

Requirements

Designed for Windows XP/7/8 operating system or later, PC equipped with an available USB port

Recordings memory requirements

Compressed mode: 21 MB per hour, equivalent to 1 GB of HDD space for 47 hours recording time

Protection of recordings

General password for access to the system and/or specific password for each recording

Installation

Quick and simple connection to every telephone handset

Number of recordings

Virtually unlimited (limited only by free HDD space)

Audio recording

TDR-P records using his internal sound card, without affecting the native PC's audio resources

Power source

Directly powered from the USB port, no external power supply needed

Generals

Power supply : from USB, 5V_{DC}, 100 mA
USB cable length : 1.5 meters
Size/Weight : H55 x W80 x D25 mm / 120 gr

Product code

TDR-P Hardware and software equipment with universal phone handset interface to record from any telephone or from analog lines
